

## 2. COMBAT INFORMATION SCREEN (CIC)

After the introduction, 5th Fleet opens with the CIC screen, showing a typical US Navy CIC containing a number of computer consoles that allow access to certain game functions. There are four “hot-spots” that will activate when you roll the mouse pointer over them.

**COMNET:** The console in the upper left — the words “System Configs” appear when the mouse rolls over this console. [Click here](#) to go to the COMNET screen.

**SCENARIO:** The console in the center of the screen — the word “Scenarios” appears when the mouse rolls over this console. [Click here](#) to go to the Scenarios Screen.

**REFERENCE:** The console in the lower right — the words “Tactical Reference” appear when the mouse rolls over this console. [Click here](#) to go to the Tactical Reference Display.

**EXIT:** The “hatch” leading out of the CIC — the word “Exit” appears when the mouse rolls over this point. [Click here](#) to exit the

5th Fleet program.

The other graphics on this screen are for decorative purposes only.
